

response showing the changes thereto. The substitute specification includes the changes requested in the Official Action and includes the tables that have been moved from the drawing section.

New Figure 21 has been added that shows the flow chart suggested in the Official Action.

The specification has been amended to make editorial changes therein, bearing in mind the criticisms in the Official Action, to place the application in condition for allowance at the time of the next Official Action.

The indication that the claims include patentable subject matter is acknowledged with thanks.

In view of the present supplemental amendment, it is believed that the present application has been placed in condition for allowance. Reconsideration and allowance are respectfully requested.

Respectfully submitted,

/ YOUNG & THOMPSON
